        out.println("</head>");
        out.println("<body>");
        out.println("<h2>Welcome " + username + "</h2>");
        out.println("<p>Session information is being "
            + "maintained using a Hidden Form Field.</p>");
        out.println("<form action='HiddenServlet' " + "method='post'>");
        out.println("<input type='hidden' " + "name='username' " + "value='" + username + "'>");
        out.println("<input type='submit' " + "value='Continue'>");
```

```
out.println("</form>");
out.println("</body>");
out.println("</html>");
}
}
```

The image shows two browser screenshots. The first screenshot is for the URL `localhost:8080/IP_ex7/index.html`. It displays a page titled "Session Tracking - Hidden Form Field". Below the title is a form with the label "Enter Your Name:" followed by a text input field containing the text "Alice". Below the input field is a "Submit" button. The second screenshot is for the URL `localhost:8080/IP_ex7/HiddenServlet`. It displays a page titled "Welcome Alice". Below the title is a message: "Session information is being maintained using a Hidden Form Field." Below the message is a "Continue" button.
